PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience building high-performance, accessible web applications with React.js and Next.js. Translates Figma designs into pixel-perfect, cross-browser interfaces with a strong focus on UI/UX, design systems, and responsive layouts. Delivered a 30% improvement in Core Web Vitals on production apps through systematic performance work — lazy loading, tree-shaking, and build-pipeline optimization. Integrates REST APIs, implements authentication, and collaborates in Agile/Scrum teams, with growing full-stack capability in Node.js.

PROFESSIONAL EXPERIENCE

Oxiliry — Sr. Frontend Engineer

April 2021 – Present

- Delivered a 30% improvement in Core Web Vitals across production ReactJS and NextJS applications by eliminating unused assets, optimizing the build pipeline, and applying lazy loading, tree-shaking, and image compression.
- Analyze the complete Chat Interface UX problems and enhance the complete chat Interface with a completely new UI without breaking the existing code and functionality.
- Built responsive, cross-browser web applications in NextJS, implementing pixel-perfect UI from Figma designs with consistent behavior across devices and browsers.
- Translated detailed Figma mockups into accessible, WCAG-aligned interfaces while maintaining consistent coding standards and a reusable component architecture.
- Integrated RESTful APIs and implemented robust form validation with React Hook Form, improving data reliability and reducing input errors.
- Collaborated in Agile/Scrum ceremonies — stand-ups, sprint planning, and retrospectives — maintaining version-controlled code across Git and Bitbucket.

Elite International Group — User Interface Designer

November 2020 – March 2021

- Led the end-to-end UI redesign of a full LMS platform — dashboards, student portals, and admin panels — using a component-based design approach.
- Migrated the design workflow from Adobe XD to Figma, establishing a collaborative, cloud-based process with real-time feedback and faster handoff.
- Built and maintained a design system — reusable components, tokens, typography, spacing rules, and icon libraries — for visual consistency across the product.
- Ran structured design-handoff sessions with developers, ensuring pixel-perfect implementation and eliminating design-to-build ambiguity.

TECHNICAL SKILLS

Frontend: ReactJS, NextJS, JavaScript (ES6+), TypeScript, HTML5, CSS3

UI & Styling: Tailwind CSS, Bootstrap, MUI, Mantine UI, SASS/SCSS, Ant Design, Responsive Web Design

Design & Handoff: Figma, Design Systems, Component Libraries

State Management: Redux Toolkit, Zustand, Context API

Backend & APIs: Node.js, Express.js, REST APIs

Databases & ORM: PostgreSQL, MongoDB, Prisma, Drizzle

Accessibility: WCAG, Semantic HTML, ARIA, Cross-browser Compatibility

Performance & SEO: Core Web Vitals, Lazy Loading, Code Splitting, SSR, SSG, SEO

Tools & Deployment: Git, Bitbucket, Jira, Vercel, Docker, CI/CD, Agile/Scrum, Docker

CMS: WordPress

SELECTED PROJECTS

Verdira

Tools: Next.js, Vercel, Tailwind CSS | verdira.com

- Rebuilt a static marketing site into a scalable web app with authentication and password-protected client areas, restructuring the codebase for long-term maintainability.

Vape Planet

Tools: Next.js, React, Tailwind CSS, Material UI | vapeplanet.co.uk

- Independently built the frontend of a production e-commerce platform, integrating payment workflows and optimizing performance across devices.

AussieMotor

Tools: Next.js, Tailwind CSS, Mantine UI, Firebase, MongoDB | aussiemotor.com.au

- Contributed to migrating a large automotive marketplace from WordPress to Next.js, building dashboard interfaces and reusable UI components.

Select & Health — Healthcare Web Platform

Tools: Figma, Design System, UX Audit

- Designed a component-based Figma design system for a patient-facing healthcare platform, prioritizing clarity, accessibility, and streamlined developer handoff.

Talha Estate

Tools: WordPress, UI Redesign, Custom Development | talhaestate.com

- Designed and built a modern real-estate platform with well-structured property cards and clean typography on a custom WordPress CMS.

Digestive Care

Tools: WordPress, HTML5, CSS3, JavaScript | digestivecarepl.com

- Built a responsive healthcare website with an integrated patient portal, customizing themes to match branding and appointment-booking workflows.

Cennetsol

Tools: WordPress, HTML5, CSS3, NextJS, GSAP | cennetsol.com

- Built a responsive healthcare website with an integrated patient portal, customizing themes to match branding and appointment-booking workflows.

EDUCATION

Bachelor of Arts — University of the Punjab

2020 – Present

Intermediate — Government College Township, Lahore

2018

CERTIFICATIONS

Certified Web Designer & Developer — PSDF Pakistan,

March – 2020
